Energetic and adaptable web developer, recently graduated with a degree in Computer Engineering and a focus on web development. Backed by a solid understanding of programming fundamentals, practical exposure to various web development technologies and eager to apply my knowledge in a professional environment. Passionate about learning new technologies and collaborating with teams to tackle challenges and deliver valuable solutions.

EDUCATION

King Mongkut's Institute of Technology Ladkrabang (2020 - 2024)

Bachelor's Degree of Engineering

Major : Computer Engineering

- Score : GPA 3.25

TRAINING

Passed - CCNA Training June 2023

- Cisco Certified Network Associate an entry-level certification IT from Cisco
- achieved a letter of Merit in this course

PROJECT

Programming Laboratory Management System (PLMS)

2023-2024

This website serves as my final year project, designed specifically for college programming classes. Its purpose is to assist students in learning concepts through problem-solving in Python language, while aiding instructors in class management. It simplifies lab management, encompassing tasks such as classroom organisation, student enrollment, and exercise administration. Developed using Docker, React, Php CodeIgniter3, and Express.js, this project offers a comprehensive solution for both students and instructors alike.

KKCT Union Application

2022

Designed and developed a credit bureau application as a learning project focused on software architecture and design. The goal was to streamline the dissemination of credit information to customers through financial transaction companies. With this application, users can conveniently access their credit profiles, reducing the time spent on crucial transactions. This project was developed using Kotlin and Spring Boot.

Daddy Bingo Pizza

2022

Designed and developed a pizza delivery web application. It has two views: Customer view and Staff view. The Customer view allows customers to place custom pizza orders, while the Staff view enables staff to access information about orders. This project was developed using React Native, Express.js, and MongoDB for data storage, facilitated by Mongoose.

WORK EXPERIENCE

CODIUM COMPANY LIMITED

May 2023 - July 2023 & July 2022 - August 2022

Intern front-end developer

- Served as a member of an implement team, creating web applications with Angular
- Created features and functionality of the online document management system and electronic signature (E-MEMO) using Angular as requested by clients
